

PROFILE
COMPANY
FOR MEDICAL PRINTING SOLUTIONS

ABOUT US

- Our software bridges the gap, converting **DICOM** print requests from modality consoles into standard Windows print jobs, enabling any office printer to function as a **DICOM** film printer."
- "We offer a software solution that seamlessly translates **DICOM** print commands into Windows print commands, effectively transforming your existing office printer into a medical imaging printer

WALTZ RUMBLE REPAIR

All customers' devices connected with our company server to follow up and handle all problems immediately

ARRIVE AT THE RIGHT TIME WITH THE RIGHT TOOLS

Strive to be your most talented, trustworthy and considerate service provider

OUR FOCUS

is to provide efficient and perfect hardware and software that will produce the absolute best quality available. To ensure high quality, our staff consists of specialists to satisfy our customers' needs as following

01 Repair Faults Remotely

02 All customers' devices connected with our company server to follow up and handle all problems immediately

03 Arrive at the right time with the right tools

04 Strive to be your most talented, trustworthy, and considerate service provider

GOALS AND OBJECTIVES

Let's See What We Do?

Our software solution turns office printer into a full-featured DICOM printer. Our software is able to receive print requests directly from modality's console, then to translate them to standard Windows print requests, and to forward them to office printer(s). A system made up of a PC running Software, plus a standard office paper printer, fully replaces a Software film printer. Implied cost savings are huge, and the system pays itself in a few weeks.

Let's See Who We Are?

Today most medical institutions have adopted a fully-digital diagnostic workflow: radiologists normally perform their diagnosis directly on the screen of dedicated workstations. Nevertheless, there is still the need to take medical images out of the hospital, for instance to provide copies of the exam images to the patient, or to accompany the report for the referring physician. A "hard copy" of the acquired medical images is certainly the most immediate and effective mean for most users.

XMPS

XMPS has the technology, industry expertise and customized solutions to empower organizations across multiple sectors, including hospitals, radiology centers and medical centers. Whether you need to digitize your documents, automate your workflow, optimize your printing environment or secure your network, we have what you need.

SUSTAINABILITY

66%

There's a growing movement within Egypt's hospital sector, with around 80% prioritizing the minimization of fixed expenditures. A key component of this effort is the conversion from plastic to paper X-ray films, intended to

Our commitment to sustainability is evident in our paper-based X-ray films, which offer an eco-friendly and economically advantageous alternative to plastic films. Backed by a highly skilled team of engineers and consultants, we specialize in providing cutting-edge technological solutions that enable businesses to reduce waste and foster a more sustainable future

EQUIPMENT

We maintain a robust inventory of our proprietary printers, equipped with a cutting-edge printing system that leverages the latest advancements in X-ray paper printing technology. Our diverse selection ensures we can comprehensively meet the unique needs of our clientele

XEROX 7835 - XEROX C60

These printers offer more than just printing; they provide a range of functionalities, including copying, faxing, and scanning. Furthermore, these versatile machines can connect to multiple devices, enabling printing from various sources

ORGANIZATION

Our fully automated system streamlines and professionalizes every step of our business operations

ENGINEERS

SYSTEM

**CUSTOMER
SERVICE**

Our organization employs a complete team of engineers, with specialized training in this industry, rather than technicians, to guarantee top-tier quality and efficiency.

"Our dedicated customer service team operates around the clock, 24 hours a day, 7 days a week, to promptly respond to all customer inquiries."
